Viget UX Homework Assignment

Neal Humphrey

My submission is in response to Prompt #3 – "Help me decide where to go this weekend." Both "presentations" requested are provided as written reports, since the project stipulates that I should assume they will be reviewed without me present. All resources are available for download on my personal website: nhumphrey.com/temp/viget

Notes:

- Wireframes take a visual-realistic approach, as I find the details of text size and shading can make a big difference as to what components are feasible to include in a design.
- Images in mockups are from Wikimedia, and a screenshot of the Mapbox Outdoors map style. Icons are from Noun Project.
- Mockups only cover the primary features that I was able to complete in the time allotted.

Task	Time Allotted	Actual Time
Concept Report	3h	2h 30m
Mockups	4h	4h 15m
Testing Plan	1h	0h 50m
This Summary and Content Upload	na	0h 20m
